

Finishes & Specifications

Leg Construction	Constructed using 2-1/4" OD x 13 gauge steel. Base is cast aluminum. Foot is attached to column with combination of bolting/welding. Product is electrostatically powder coated for durability. Wire management holes are standard 1-1/4" x 2". 2 per leg.
Worksurface	Manufactured using 1" thick, 45 lb industrial particleboard. Standard is laminated with HPL of 0.035" thickness with a balanced backer. 2 Flex Grommets are standard.
Worksurface Edge	3MM PVC is machine applied using a moisture curing PUR (polyurethane) adhesive containing no VOC's.
Flip Mechanism	Handle is centered and mounted underneath the table. Housing is injected molded, heavy duty plastic. The aluminum pivot and metal slider inside the housing interact to give a solid fit.
Modesty Panel	Fabricated Steel with durable powder coat
Top Finishes	CFC Standards— Woodgrains—Solids—Nebulas Premium HPL— Call for upcharge (based on quantity)
Casters	Standard 3" black casters included (2 locking / 2 non-locking)
